RE: Permit No. 01221

Gentlemen:

U. S. Corps of Engineers Form 4345-1, Section II of Application for Permit to Discharge asks this question: "Has application for Water Quality Certification of description of impact been made?". We would like to initiate whatever action is necessary to obtain this certification. You have a record of the above referenced permit and we would appreciate your assistance in this matter. We have submitted our Form 4345-1 prior to July 1, 1971 as required, but indicated on the form that we have not applied for the certification.

Sincerely yours,

M. I. M. C.

  
George H. Lowry
